VENTURE DESIGN WORKS

PRESS-BOT is a coffee press designed to fit inside a Nalgene® water bottle. Gone are the days of carrying a separate container for brewing your coffee or tea; PRESS-BOT allows you to use your water bottle as a coffee pot and make a quality cup of coffee no matter where you are!

Great for making coffee or loose leaf tea at home, in the car, at work or in the backcountry, PRESS-BOT is a must have product for the on-the-go coffee aficionado. PRESS-BOT is designed to work with 32oz, wide mouth, Nalgene® water bottles.

BottleBrush is a long handle brush for cleaning all your dirty sport bottles. We always had a few bottles that just never seemed to get clean so we created a brush that could fit every sport bottle we had; bike bottles, Nalgene's, SIGG bottles, you name it. The extra long handle makes sure you get to the bottom of the bottle and the sponge head makes sure you don't scratch anything. We even built a micro brush into the handle for cleaning out the threads on the bottle caps. Pickup a bottle brush and finally get rid of those little black spots that seem to live in all water bottles after the first week of ownership.

Press-Bot	£14.99
Bottle Brush	£5.99
